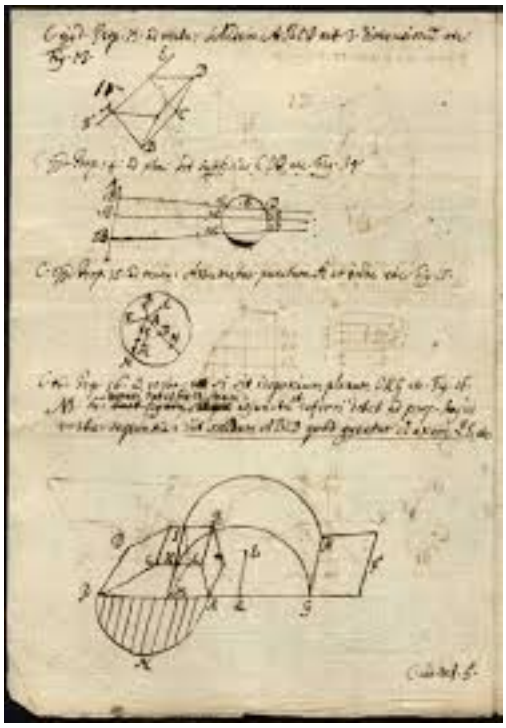
# Individualismo y La Arte III – La Profundidad y Optimismo de una Chanca



By Shomit Sirohi

Introduction

By Pope David Francis

All of this completes the work of Encyclopaedia in Hegel, but with Sirohi. Now take history but make it materialist as Philosophy of History. I add all of this is for the black people in jazz renditions in actual fact.

Take a dialectical spin through anything with Hegel and shift it to Sirohi. I mean cover coinage and bi-univocal axes to in fact coinage in poverty and wealth. Now cross out wealth and be with poverty. But artistically, like Averroes in the Quran just written in Armenian.

I mean now Gospel and New Testament to be followed in good wishes to Sirohi, who completes his first five years of full philosophy with a

Pascalian wager, we are all about the chance of winning a meeting soon. All of this then is Jerusalem Bible well covered for the day.
